

Environmental Policy Statement

At Midland Chemicals, product performance is interlinked with a longstanding concern for health, safety and the environment, guaranteeing customer's peace of mind.

Scope:

This Company Policy statement applies to all aspects of Midland Chemicals' business including the manufacturing processes, design and application of our products, technical services, the purchasing of raw materials and disposal of wastes.

To ensure this is achieved, Midland Chemicals shall, where possible:

- Work with our stakeholders to identify and evaluate the environmental impacts of products.
- Use environmentally sound operating practices and technologies.
- Our specially qualified staff set and review annually, objectives and targets in line with ISO 14001:2015 to maintain and improve performance in those areas that have a significant environmental impact, in particular ensuring safe and efficient storage, handling and transportation of all materials.
- Manage all processes to maintain emissions to below legal limits.
- Optimize the use of fuel, energy, water and raw materials.
- Reduce waste by process improvement, re-use and re-cycling.
- Ensure safe and efficient storage, handling and disposal of all wastes.

Communication:

The display of this policy statement in the factory reception is to inform visitors and remind staff of the Company's commitment to environmental responsibility.

For and on behalf of Midland Chemicals.

Sunil Pathak (M.Sc.)
Managing Director
